Discover ArcFlow

ArcFlow Distribution System

AI Driven Distribution System designed for distributors and supplier to streamline workflows and automate manual tasks.

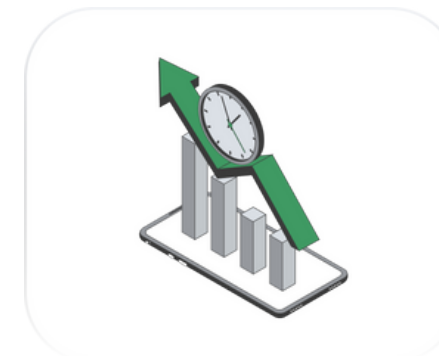

Workflow Automation

The interconnected systems streamline manual workflows across departments, enhancing daily operational efficiency and reducing costs.

AI Driven

ArcAI enhances decision-making, automates tasks, and boosts productivity within your existing resource capacity.

De-Risking Digital Tool Adoption

No initial setup costs; our data team cleans, structures, and migrates your data for seamless implementation with on-demand support.

ArcFlow System Overview

[Video Overview](#)

ArcFlow Distribution System

AI Driven Distribution System designed for distributors and supplier to streamline workflows and automate manual tasks.

Sales

Oversee and optimize complete sales cycles while managing customer relationships effectively.

Procurement

Manage procurement life cycles and oversee supply chain operations efficiently.

Warehousing

Inventory management, stock tracking, and the storage and distribution of goods.

Fulfillment

Oversee customer order fulfillment, processing, and tracking of deliveries.

User Management

Monitor and manage employee performance and system access.

Blueprints

Create & manage items, assemblies, and products, along with their associated manufacturing routes.

01 Sales, Procurement, Warehousing and Fulfillment Modules.

02 AI Driven Automated Order Plan Suggestions and Supplier KPI and Selection.

03 Automated workflows to eliminate manual tasks and support business scaling with current resources.

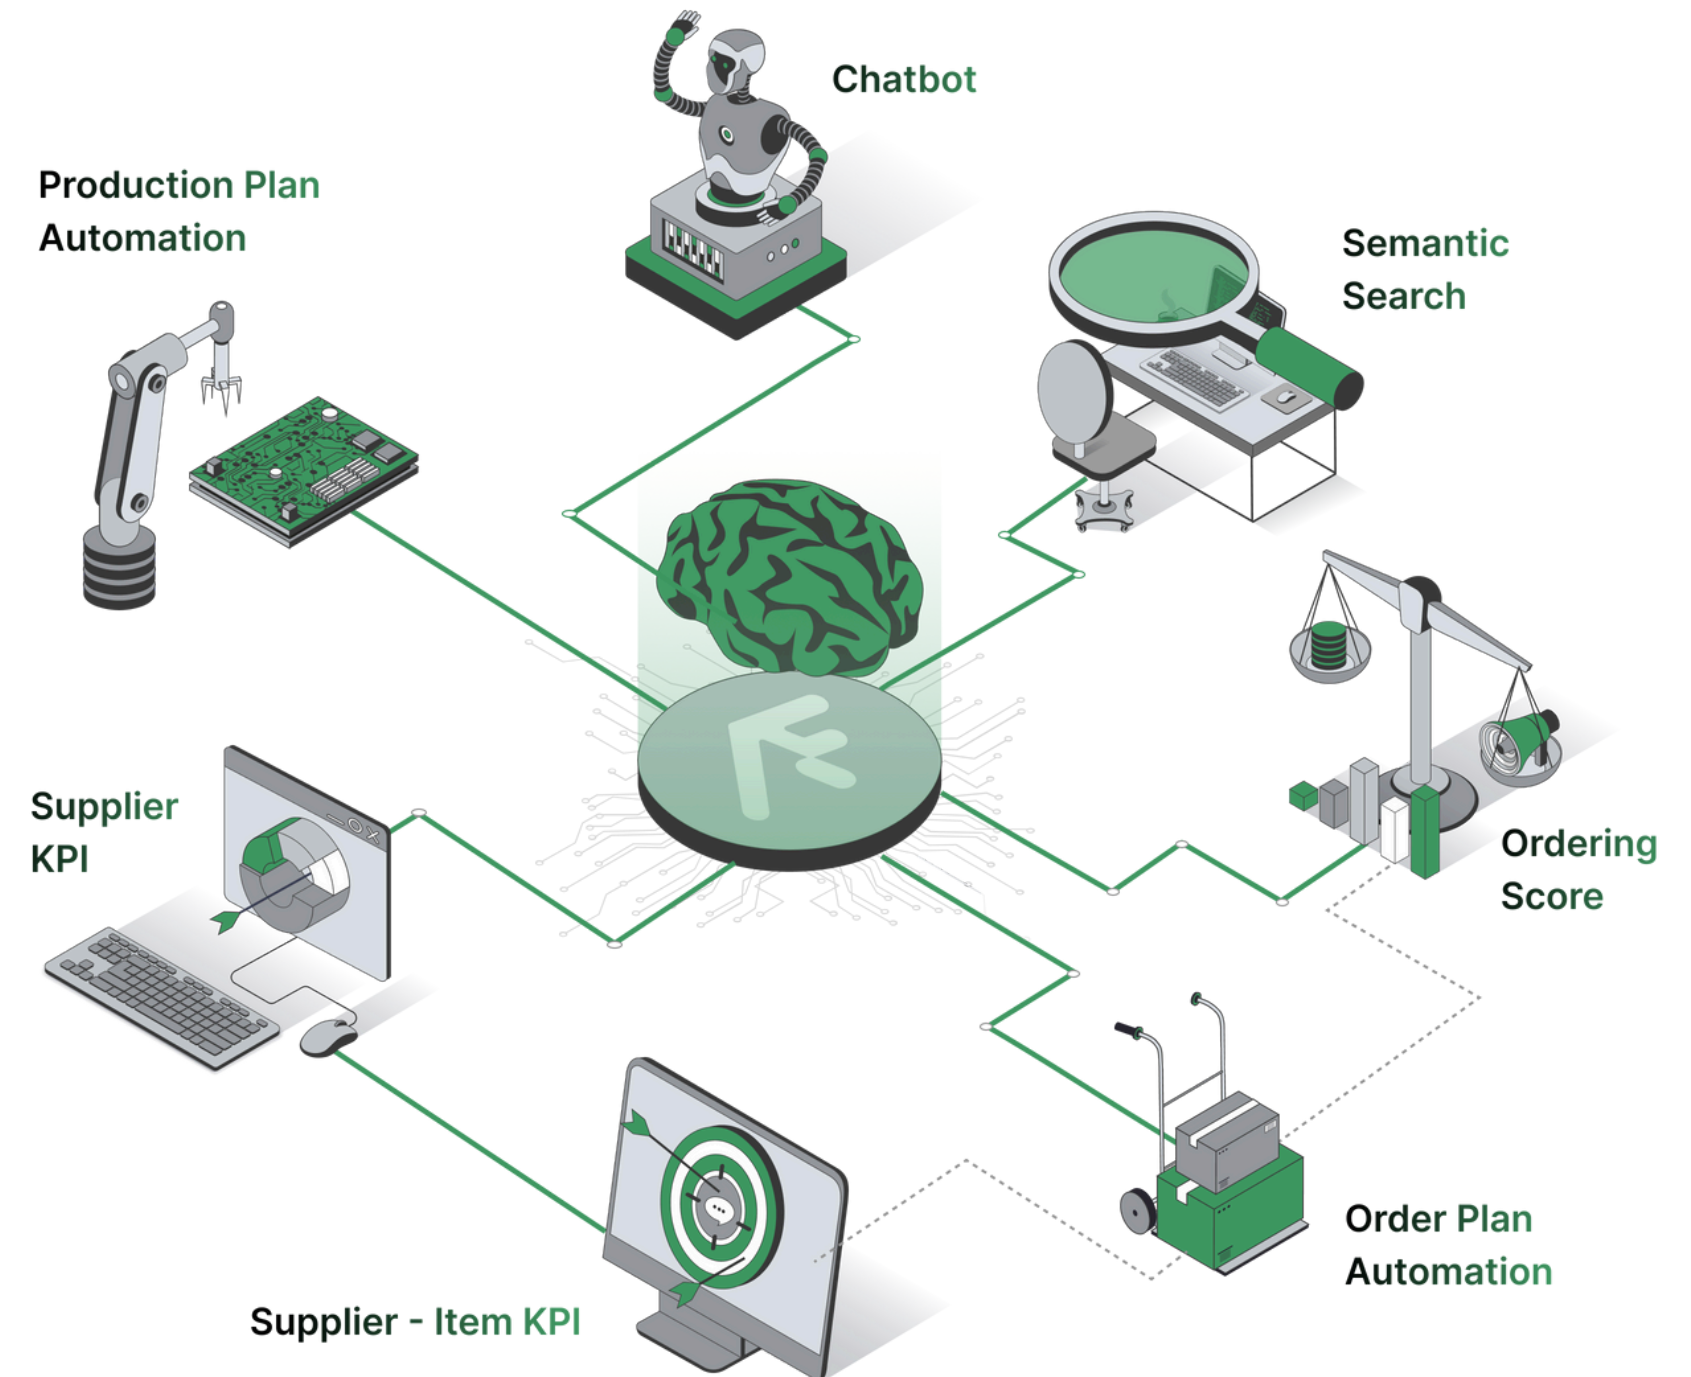

Artificial Intelligence

SME Benefits

- ArcAI automates repetitive tasks, helping SMEs scale efficiently with their existing resources.

Core AI Features

- The **Suppliers KPI and Selection** model assesses performance on key metrics and recommends the best suppliers during quoting and purchase orders.
- The **Order Plan Automation** model uses 37 key metrics to recommend items and quantities for ordering, tailored to meet constrained timelines.
- The **Inventory Management** model utilises demand patterns, usage rates, forecasts, minimum stock thresholds, and reorder points to provide detailed insights into stock levels and strategic planning.

Implementation Process

Process Mapping

ArcFlow begins with a detailed business analysis to assess functionality needs, operational requirements, and project risks, involving discussions with stakeholders, identifying pain points, and mapping workflows to deliver a tailored solution.

Data Migration

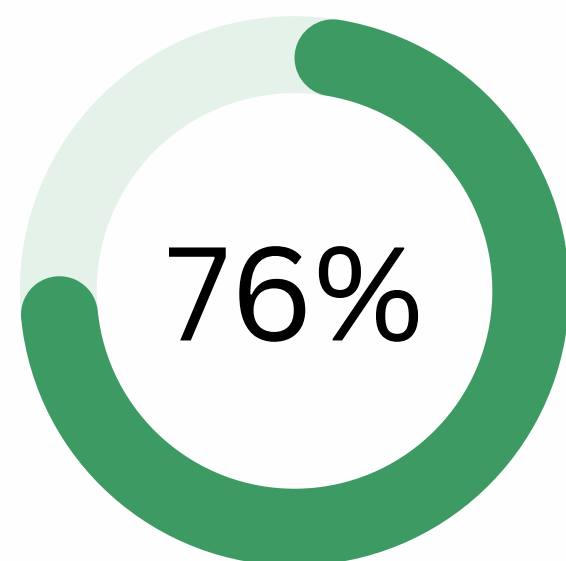

This phase involves the meticulous cleaning and migration of your data onto the system. ArcFlow ensures the accuracy and integrity of the data, addressing any inconsistencies and optimising data structures for efficient utilisation within the ArcFlow environment.

Onsite Implementation

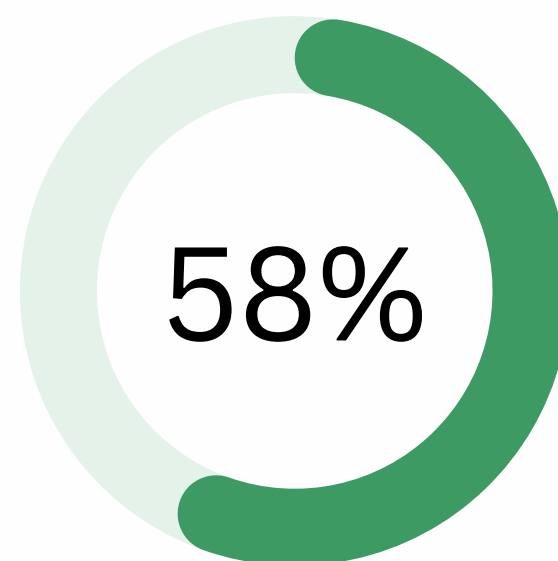

ArcFlow will conduct an onsite visit to implement the system, train all staff, and run simulations to ensure proper configuration before going live, providing hands-on support throughout the process to guarantee a smooth transition.

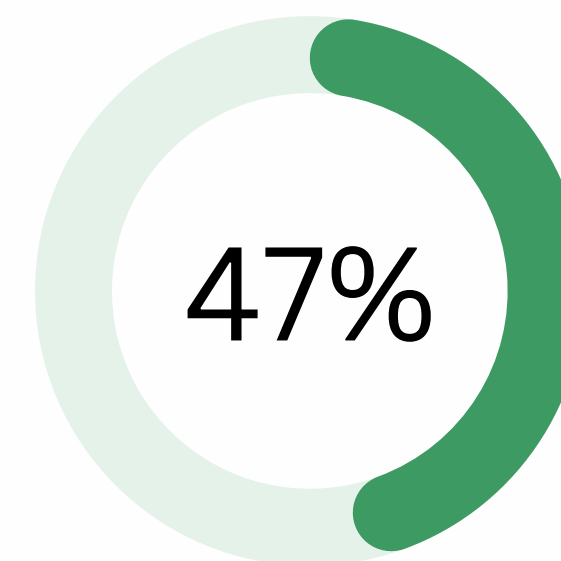

Productivity Benefits of ArcFlow

Reduced Order Plan
Creation Time

Reduced Order
Plan Life Cycle

Reduced Store
Holding Cost
